

BAY ADAPT CURRENTS

METRICS THAT MOVE WITH THE TIDES

OVERVIEW

Bay Adapt Currents is a **dynamic, data-driven dashboard** developed by the San Francisco Bay Conservation and Development Commission (BCDC). It is a centralized platform to **monitor and report on the region's efforts to adapt to rising sea levels.**

KEY FEATURES

11 metrics tracking...

- ▶ Hundreds of sea level rise policies in 55 Bay Area cities' General Plans
- ▶ Completed Adaptation Projects in the Bay
- ▶ Programs that work to build capacity on sea level rise adaptation and knowledge
- ▶ + so much more!

SIGNIFICANCE

Bay Adapt Currents supports the **Bay Adapt Joint Platform**, a consensus-based strategy to protect people and the environment from rising sea levels. The Joint Platform outlines nine actions and 21 tasks to enhance the Bay Area's resilience to sea level rise. The Bay Adapt Currents help fulfill the Joint Platform action to "track and report progress to guide future action."
